Seal Pac Skylotec

Product information

All rescue devices must be inspected on an annual basis – even unused devices stored for emergencies. With the Seal Pac, this regular inspection becomes easier. The MILAN is stored in a sealed metal box. An authorized inspector opens the sealed box once a year and checks the moisture indicator on the MILAN packaging and it's perfect condition. If everything is all right, the inspector marks month and year of the next inspection, signs, and seals the metal box with a new seal. Saving costs and time with controlled safety are the essential advantage of the Seal Pac.

Maximum Lifetime: 15 years.
