

Wire Rope Pulling Clamp LMG

Product information

The cable grip "Little Mule" is a device for gripping, pulling and tensioning wire rope and cables up to a tensile strength of 1770N/mm².

Features:

- The parallel jaws provide a firm grip without causing damage to the wire rope.
- A special spring-loaded guide prevent the grip from dropping off the wire rope and allowes instant relaese without jamming.
- The model LMG II-X is supplied with grooved jaws and is suitable for wire ropes up to a tensile strength of 1960Nmm.

The grip is always depandant on the surface condition and rope diameter.

Warning: The clamp can not be used on greased wire rope. Not to be used for lifting and hoisting purposes.

| Part code | Code | Rope Ø range mm | Pulling daN | Eye dia mm | Weight kg |
|----------------|----------|--------------------|-------------|---------------|--------------|
