Harness IGNITE NIOB

Product information

The ideal belt for the fire brigade, special deployment teams or rope access technology that sets standards in terms of functionality, wearing comfort and ergonomics. The IGNITE NIOB is the first 6-point belt in the series and impresses with its carefully thought-out, tried-and-tested IGNITE details such as intuitive colouring and adjustability. The combined abseiling / arrester eyelet in the chest area allows heavy back-borne loads to be lowered safely and without draining strength. The distance between the front eyelets is designed for use of the Radeberger hook. A restraint eyelet in the central back area can be used for securing, belaying or rope-supporting work. The lateral restraint eyelets can be folded backwards. The IGNITE NIOB also has pre-moulded material loops in the hip and chest areas for tools or rescue equipment. The IGNITE NIOB also impresses with its high wearing comfort: the thermoformed hip padding distributes the payload perfectly.
