Wire Rope Lubricant (low viscosity) Drum

Product information

General: Wire Rope Lubricant Low Viscosity, commonly known as Bel-Ray Wire Rope Lubricant, is specially formulated for ropes requiring a penetrating lubricant. Wire Rope Lubricant Low Viscosity's penetrating action draws the lubricant to the core, coating the inner strands, protecting them from rubbing wear and corrosion. Wire Rope Lubricant Low Viscosity exhibits superior water displacement to provide a positive film, even on wet ropes. The anti-wear and anti-corrosion properties protect the wire rope inside and out, as well as protecting sheaves and drums.
