complying with CE harmonized standard EN 359,99, EN 361/2002 & EN 1497/2007. Check the individual product label for applicable standard and year.
Issue H Aug 2020

FITTING INSTRUCTIONS

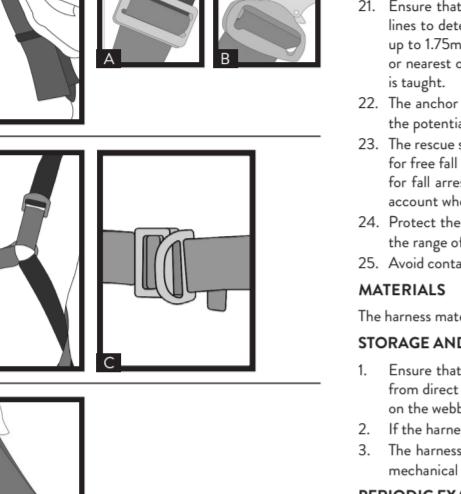

It is recommended that the user carries out a test suspension in a safe place before using the harness for the first time, to ensure it is comfortable and suitable for your torso.

STEP 1
Always wear by shoulder straps, ensure there are no twists in the straps and place over shoulders and arms.

STEP 2
Some models are fitted with additional waist belts and/or shoulder comfort pads.

STEP 3
Fasten cross strap buckle same as legs. Some models have a front attachment point (A). Remove fitting if not required. Ensure that the loose tail is fastened over the shoulder strap. Ensure that the loose tail is fastened over the shoulder strap as necessary. If a non-detachable chest strap option is fitted, then fasten the buckle so that it cannot be disassembled, therefore step into leg straps before placing over shoulders.

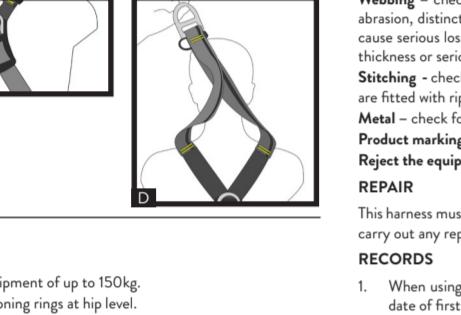

STEP 4
Put leg strap under legs without twisting and fasten buckles - types may vary (A-B). Repeat with other leg strap. Ensure that the loose tails are fasten over the shoulder strap. Ensure that the loose tail is fastened over the shoulder strap as necessary. If a non-detachable chest strap option is fitted, then fasten the buckle so that it cannot be disassembled, therefore step into leg straps before placing over shoulders.

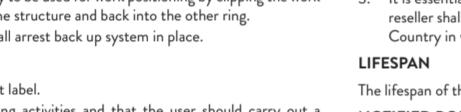

STEP 5
If a work positioning belt is fitted, adjust as necessary to avoid twists.

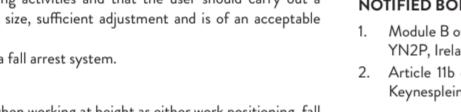

STEP 6
Tighten both leg straps by pulling on the loose tail. Ensure fitting is tight but not restrictive. Retain ends with the webbing retainer sliders. Ensure final fit is both secure and comfortable. If in doubt seek expert advice.

STEP 7
Fasten cross strap buckle same as legs. Some models have a front attachment point (A). Remove fitting if not required. Ensure that the loose tail is fastened over the shoulder strap. Ensure that the loose tail is fastened over the shoulder strap as necessary. If a non-detachable chest strap option is fitted, then fasten the buckle so that it cannot be disassembled, therefore step into leg straps before placing over shoulders.

STEP 8
Fasten cross strap buckle same as legs. Some models have a front attachment point (A). Remove fitting if not required. Ensure that the loose tail is fastened over the shoulder strap. Ensure that the loose tail is fastened over the shoulder strap as necessary. If a non-detachable chest strap option is fitted, then fasten the buckle so that it cannot be disassembled, therefore step into leg straps before placing over shoulders.
